impression of the spectrum of creative models of Modern TRIZ, which can be opened in any design and managerial decisions.

Modern TRIZ Modeling in Master Programs | SpringerLink

TRIZ was developed as a theory and a set of applied tools to support solving so-called "non-ordinary" problems in technology and engineering: problems which can not be solved with known formal methods, for example, mathematical optimization or configuration change. Such problems require new, out of the box solutions unknown before.
