Yokogawa

All the CENTUM series field control stations (FCSs), both software

and hardware, have

been developed by

Yokogawa. CENTUM

VP can be flexibly

designed ranging from

small- to large-scale.

The CENTUM VP

controller is capable of

handling a massive

amount of field data at

Where To Download

comfortable speeds that fully satisfies the needs in the field digital era.

CENTUM VP DCS |
Yokogawa America
Yokogawa has developed a servo module and a high-speed protection module as turbomachinery I/O modules and has developed the turbomachinery control

Where To Download

system on the
CENTUM VP platform.
A range of new high-
speed I/O modules will
be added using this
platform for deployment
to the high-speed
control field (electric
control and servo
systems) which is
difficult to accomplish
by conventional DCS.
