Description. "An additional assumption was that the processes for theory development were new to nursing and hence, nurses in graduate programs learned strategies for advancing knowledge from other disciplines. This assumption was debunked with the knowledge that nurses were always engaged in knowledge development, driven by their

Theoretical nursing : : development and progress ...

The nursing science has come to existence since only a few years ago, and we can say in certain that it is a young and new science but with a good progress. As it is a new science and because of dealing with human being, it has faced numerous scientific developments, and several paradigms are simultaneously created due to multidimensional nature of the human being.
